

Quick Guide for DDSCB:2021

(Updated: March 2, 2021)

This Guide is designed to provide you with basic information about playing the game. More detailed actions and activities can best be learned through experimentation as you play the game and by asking questions within Wolverine's DDSCB:2021 forums.

[**Note:** After downloading and installing the game on your computer, installing a mod to the game from the Wolverine Studios mods forum that will show correct conference names, team names and nicknames, and logos for teams and conferences, and actual court designs for each team and tournament can provide a more satisfying experience as you play the game.]

[**Suggestion:** It's always a good idea to SAVE frequently. While the game is very stable, Saving prevents you from losing actions you've taken in the event of either a game or computer issue.]

List of Topics:

- Main Menu
- Create New Association
- Association & Team Screens
- Moving Through the Season
- Game Play
- Creating a Universe Mode Association
- Loading a Saved Association
- Promotion/Relegation Mode
- Exhibition Games
- Tournament Mode
- Import CB20 Association
- Update Multiplayer Associations
- On-Line and Multiplayer Associations
- Exporting Rookies to Draft Day Sports: Pro Basketball
- Restore Backup
- License Key Management
- Database Editing

Main Menu:

The following options are available:

- **New Association**—creation of a new association
- **Load Association**—load and play an existing association (select the desired association's .cbb file)

- **Continue Association**—will load the last association you were using
- **Exhibition Game**—can select 2 teams to play an exhibition game (both can be controlled by the CPU or one of the two can be human controlled)
- **Tournament Maker**—can set up and play out 16, 32 or 64 team tournaments
- **Import CB20 Association**—Select and then import an existing association from DDSCB2020
- **Update Multiplayer League**—allows updating of multiplayer leagues
- **Restore Backup**—provides a way to restore a backup of an association
- **License Key Management**—allows management of your game license
- **Database Creation**—Edit the default database for the purpose of creating associations.
- **Exit Game**—closes the game

Create New Association:

1. After loading the game, click on **NEW ASSOCIATION**.

- You then will have 4 different modes for 4 different versions of the game (**Challenge, Sandbox, Multiplayer, and Universe**). This guide will show how to create a new association using the Challenge Mode. Creation of a Sandbox association is basically the same except for choosing Sandbox mode rather than Challenge mode. Basic setup for a Multiplayer league and a Universe concept is covered later in this guide.

2. Select **CHALLENGE** and the **Basic Game Setup** page will load:

The **STANDARD** mode (the Division I conference alignment) is selected by default, but if you prefer to play the **PROMOTION/RELEGATION** mode, enter a checkmark into the small box in front of that name. (If you choose Promotion/Relegation Mode, the teams will be aligned into twenty-two 16-team conferences plus 5 Independent teams with each conference having teams with similar levels of prestige. At the end of each season 4 teams will move up to a higher conference and 4 teams will move down to a lower conference based on their conference records and success within the conference tourney.)

- Create the **Save Name** (abbreviation) you wish to use for your association. Files for you game will be designated by this name (e.g., CBA).
- Enter your **Association Name** (e.g., Continental Basketball Association).
- If want a **start year** different that 2020, change the year.
- If you've installed a mod and want the NCAA logo rather than the generic logo, click on the **Select Association Logo** button and from the "assn" folder within the "logos" folder double click the NCAA logo.
- **Rename the tournaments** if you desire (e.g., NCAA, NIT, CBI and CIT...or whatever else you prefer).

3. Click on **ASSOCIATION SETTINGS** on the bar at the top of the screen which takes you to a new screen:

- **Association Building Options:** The Default is selected, but if you want to use a mod, then enter a check mark in the small box in front of the words "Use Custom File" and then select the mod you desire.

- **Ratings Scale Options:** Choose either 1-10 or 1-100.
 - 1-10 is going to give you the same thing as the 1-100 *adjusted* scale (just on the 1-10 scale) while the 1-100 *real* scale is going to show the actual ratings that are being used (well at least the actual ratings with a scouting error mixed in).
 - The 1-100 adjusted range is going to only change how the ratings are displayed, not what they really are. The player really might have a 50 in scoring but if that is one of the best scoring ratings in the game then it would display as a 90 or something like that.
 - This is strictly a matter of how you want the information displayed to you as the actual numbers used for the simulation are the same in all three cases.
 - The "adjusted" scale was since some people did not like the fact that without it the highest rated player in the association might be a 60 in scoring or something like that (the players are all rated on the same scale as for the pro game so they can seamlessly move from one game to another so if you had a 100 scoring level player it would literally be like dropping an NBA MVP in the league). This way with the adjusted scale you would "see" players with 90s for ratings and they can easily register that the player is one of the highest rated in that category in the game.
- **Additional Options:**
- Check-marking **Auto-Save Association** will perform an automatic save at the end of each month in the season.
- Check-marking **Allow Conference Movement** will allow the CPU to occasionally move teams from one conference to another.
- Set **Injury Factor Percentage**: Default is 100% but you can decrease or increase injury frequency by using the pulldown to select from 0% to 200%.
- Set **Job Pressure**: Default is Normal, but you can lessen or increase pressure by using the pulldown menu to select Low or High.
- **Recruiting Options:**
- Allow **Illegal Recruiting** is the default, but you can prohibit that by removing the check mark.
- Check-mark **Prevent Underclassmen Declaring** if you do not want players to be able to declare for the pro draft before graduation.
- **Set Recruiting Difficulty**: The default is set to Normal, but you can make recruiting easier or harder by using the pulldown to select Easy, High or Brutal if you desire.

4. Click on **FINALIZE** on the top bar which takes you to a new screen:

- If you want to cancel what you've done thus far, click on **Cancel Association Creation** which will take you back to the initial menu. Otherwise click on **Accept Settings/Continue to Coach Creation** which will take you to a new screen:

5. Bio Information:

- Click on **Select Picture** and choose the picture of your coach.
- **Clothing Style**: Click on the pulldown and then select one of the 55 different clothing styles for your coach.
- Enter your coach's **First Name, Last Name, Age, Dream Job** (use the pulldown to select this if you wish). If you want a **password**, enter it...but a password is only required for multiplayer leagues.
- **Personality Trait**:
- **Select Ambition Level**: Use the pulldown to select from Very Low to Very High.
- **Select Academics Importance Level**: Use the pulldown to select from Very Low to Very High.

- **Select Discipline Level:** Use the pulldown to select from Very Low to Very High.
- **Select Integrity Level:** Use the pulldown to select from Very Low to Very High.
- **Select Temper Level:** Select the icon that most approximates what you want for your coach.

6. Click on **Philosophies** from the bar at the top of the page and a new screen will be displayed:

- Adjust the **10 sliders** to what you want for your coach (information about each one is provided below each slider).

7. Click on **Skill Settings** on the bar at the top of the screen which takes you to a new screen:

- **Select Coach Model:** Use the pulldown to select from Rookie to Custom.
- **Select Maximum Development Level:** Use the pulldown to select from Rookie to Custom.
- Adjust the **5 sliders beneath Current Ratings** (Current Points Remaining are shown below the sliders...before you increase a rating you will need to decrease another rating so that you have available points).
- Adjust the **5 sliders beneath Potential Ratings** (Current Points Remaining are shown below the sliders...before you increase a rating you will need to decrease another rating so that you have available points).

8. Click on **Job Selection** from the bar at the top of the screen and a new screen will be provided:

- You can also prioritize the **Prestige, Facilities, and Academics** columns by clicking on the column headings to rank order colleges by those factors.
- You can enter a specific college by entering the name in the **Search** box.
- Head Coaching jobs only are displayed by default, but if you prefer to start as an assistant coach, deselect **Head Coaching Jobs Only** which will then display head coaching and assistant coaching jobs that are available. You can use the **slider** to move through the head coaching and assistant coaching jobs that are available.
- **Highlight and select the job for your coach.**

9. Click on **FINALIZE** on the top bar on the screen to display a new screen:

- If you want to cancel the creation click on **Cancel League Creation**. Otherwise click on **Save & Finish League Creation**.
- Your association will then be created by the CPU. Click on **Continue** when that process concludes and you will be taken to the Association **Login** screen.
- Click on **Login** to go to your team's screens. (New associations beginning date is May 1.)
- **[Suggestion:** Click on the Maximize icon to make the game screen fill in your entire screen.]

Association and Team Screens:

Hamburger Menu (3 short horizontal bars) in upper left corner:

- **Version of the Game** (that you currently have)
- **Main Menu**—takes you to the Main Menu (be sure to save your game prior to proceeding to the Main Menu)

- **Save**—Save game with same file name as presently being used
- **Save As**—Allows saving of the game under a different file name
- **Sound**—Can choose to have game sounds play or be muted
- **Game Options**—Opens a new screen:
 - **Simulation Options** (toggle each option on or off as desired)
 - **Simulation Style** (select which you prefer)
 - **File Options** (toggle each option on or off as desired)
 - **Association Settings** (toggle each option on or off as desired)
 - **Task Management Options**—the AI will control the various activities for those options you select (and override actions you take related to those options you choose for the AI to perform)
 - **Association Options** (allows you to change these three factors, as desired)
 - **Tournament Options** (can change the tournament names and logos...be sure to click on the “Save Tournament Changes” button after each tournament is changed)
- **Help**—Support, Forum, Guidance, Social media, and FAQ’s
- **Credits**—Developer info

Back Button

(Presently disabled)

Left Banner Zone—Association Section:

- **Polls & Media**—Polls, News, Magazines, Norton Watch, Awards, Injury Report, Bubble Watch. Some of these do not become available until certain dates in the season. Polls, News, Norton Watch, Awards, Injury Report, and Bubble Watch (when available) are updated weekly.
- **Standings**—Standings for any conference. Use the pulldown arrow to select different conferences.
- **League Leaders**-- Sortable Team and Player statistics that can be filtered in numerous ways. Use the pulldowns for the various filters to choose different options. Columns can be sorted from high to low (or vice versa) by clicking on the column heading.
- **Almanac**—Player, Coach and Team records, Historical standings, Award winners, Champions, Schools info, Conference info. Use the pulldowns to change available options. Data becomes available after completion of the first season of your association and is updated after each succeeding season.
- **Coaching Tree**—Coaching tree by Team or Head Coach. Use the pulldowns to select the team or head coach whose tree you wish to view.
- **Tournaments**—List of Pre-Conference and Post-Season Tournaments with Defending Champs and dates. Placing your cursor on each tournament icon will shift the view so you can see the trophy for that tournament.

Left Banner Zone—Team Section:

- **Team Name** (Either begin typing a team’s name or use the pulldown to select from the list of teams which are arranged alphabetically by conference).
- **Dashboard:**
 - **Basic Team Info:** The team’s conference as well as the team’s record and basic team statistics are provided at the top.

- **Player mini-cards** are shown. These can be aligned alphabetically or by position by clicking on the appropriate icon in the “Viewing Cards” block. Clicking on a player’s mini-card opens his more detailed player card which provides the player’s bio, profile, stats, game logs, ratings progression (available after a full season of play), and allows you to text the player to discuss playing style, attitude, and grades. Editing of player information is possible by going to lower right of the Commissioner screen.
 - **Team News** (short news reports about players and recruits as developed throughout the season.)
 - **Visual graphs** (information about team and its next opponent.)
- **Staff:** Basic information about the team’s coaches. Placing the cursor on a coach’s picture allows promotion, demotion, contract negotiation, or firing of that coach. Click on a coach’s name to open their coach card with detailed information about the coach’s bio, history, ratings progression, and pipeline progression.
- **Roster:** Provides ratings for each player (these are based on coach evaluations and are subject to coaching error.) Clicking on the arrow in the white box toward the top of this section allows you to change the view to provide a listing of all players which provides basic biographical info about them. Additionally if you highlight a player, you can click on “Release Player”, “Redshirt Player”, or “Offer Scholarship” buttons should you desire to take any of those actions.
- **Stats:** Player statistics with various filters (click in the white boxes to provide various options).
- **Recruit Class:** Provides scouting service summary on committed recruits, offers by the team that have yet to be accepted, and players with known interest by the scouting service. Clicking on an underlined recruit’s name takes you to his recruit card which can reveal basic information about the recruit, skill ratings, rankings, interests of the recruit and his parents, his top 10 school preferences, and player notes. In addition, icons in the upper middle portion of the screen indicate if he has interest, if he’s visited your school, if you’ve offered a scholarship to him, and if he is from a pipeline state.
- **Depth:** Allows movement of players on the depth chart and establishment of playing time for each player. See the notes on this page for instructions on changing the depth chart and sub matrix. There are options to allow the AI to suggest depth chart and sub matrix, the AI to suggest sub matrix only, to store a lineup, to restore a lineup, to set the sub matrix by minutes and to clear the matrix. Clicking the blank area immediately to the right of a player’s name shows player stats and toggles for positions the player will play and to change point in his energy level at which he will be subbed out when simming.
- **Strategy:** Allows setting of offensive and defensive strategies. On the screens Offense, Defense, and Pressure Defense should each total 100%. You also can adjust Offensive Focus and Offensive Set Usage (the percentage your team will run sets and amount of freedom you will allow). There also are descriptions of each offensive and defensive set (use the pulldown). The right side of the screen shows player proficiencies for the various offensive and defensive sets.
- **Insights:** Summary of team statistics. Use the pulldown to review different types of information.
- **Schedule:** As soon as the schedule is set each summer, the opponents and dates for games are shown. As games are played, the results and player highs for points, assists and rebounds are shown.
- **School Info:** Background information about team. You can edit team logo, team court, Jerseys as well as selecting a non-conference rival, if desired.
- **History:** Team, Player and Coach Records and Season Recaps (available after the first full season and then updated after the end of each succeeding season.)

Top of screen icons:

- **Your Office**—Summary information about your head coach including the present season's goals. Coach philosophies can be adjusted by using the sliders.
- **Inbox**—Email list...click on an email to read its contents. Individual emails or all emails can be deleted as desired. Most emails contain information, but some include required action.
- **Phone**—A means to make phone calls to recruits, players, and athletic director. There is a Phone Time Remaining gauge giving an indication of how much remaining phone time is possible each week. After selecting the person you wish to contact, click on the "Dial" button. To exit this screen click on the "End All Calls" button which returns you to the last previous screen.
- **Alerts**—Today's notifications of action(s) needed.
- **Notepad**—Allows you to make your own notes and provides a list of player reminders.
- **Key Dates**—Season Calendar, Recruiting Calendar, and Recruiting Periods. The recruiting actions that can be taken during each period are shown.
- **Player Search**—Allows you to search players and with various filters with results that, if desirable, are sortable by all players or by all players with a conference by using the pulldown menu. There also is a search box where you can enter individual names.
- **Recruit Players**—Takes you to Recruit Screen (details provided below)
- **Coach Assignments**—Assign recruiting, scouting and practice to individual assistants...be sure to click on SAVE CHANGES after making changes to update and lock your changes.
- **Practice Plan**—Assign time allotments for offensive sets, defensive sets. The percentages you allot should total to 100%. If you haven't allotted all available practice time, the available % remaining will be shown in the box for Practice Time Remaining. Be sure to click on SAVE CHANGES after making changes to update and lock your changes.
- **User/Commissioner**—click to move back and forth between User and Commissioner sites. Coaches, players and recruits can be edited in the lower right portion of the Commissioner screen.

Moving through the Season:

If you want to allow the CPU to do all (or a portion) of the summer and fall activities prior to the start of the season when games begin being played (November 13), you can select to **Skip Summer** that is provided in the May 1 "Skip the Summer" email. This email allows you to skip to either: (a) Scheduling (to Sept. 18), (b) Practice (to Oct. 2), or (c) the Entire Summer (to Nov. 13). When you select either of these, the CPU will take over and conduct all activities up to the date you selected.

If you desire to perform the summer and fall activities (recruiting, scheduling, practice) yourself, they primarily proceed a week at a time with activities to perform each week. The **next activity** is identified in the blue rectangular box in the upper left corner of the screen. After performing that activity, proceed by clicking on **Advance** (which is shown in blue print in the upper left corner):

- **Buy Reports:** Select the desired scouting reports you wish to purchase from your recruiting budget and then click on the Advance button on that screen. Within this screen you can request the AI to make a suggestion, if you wish.

- **Summer Travel:** Select the desired summer camps you wish to attend and pay for out of your recruiting budget and then click on the Advance button on that screen. Within this screen you can request the AI to make a suggestion, if you wish.
- **Recruiting:** Each week throughout the rest of the summer and fall (and throughout the rest of the season), you can take recruiting actions by clicking on **Recruit Players** (within the left banner). This will take you to the **Recruiting screen**:
 - The Recruiting screen shows the amount of money remaining in your team's recruiting budget, the number of scholarships you have to offer, the total number of recruits you have on your call list, and the kind of recruiting period for that week. There is also a button for "Dates" that will reveal the recruiting calendar and recruiting periods. Another button at the top is for "Help". It's highly recommended you become familiar with the information within the Recruiting Help screen since it provides Quick Keys, description of icons on the recruiting screen, and help for recruiting. Also at the bottom of the "Help" page is a button for "Team Needs & Info". This provides a snapshot of your school's SAT minimum score, a current breakdown of your team by position, and a list of your incoming recruits. At the top of the Recruit screen there is a button to "Clear Lists" and a toggle turn on or off Quick Keys Usage (those keys are explained in the Help screen) and will make it easier and quicker to take the weekly recruiting actions.
 - Below that information are filters for recruiting. Recruits that are available within the filters selected will show up beneath those filters. Biographical information will be shown when the "Show Bio" filter has been selected and Ratings information will be provided when it has been gained if the "Show Ratings" filter has been selected.
 - Recruit cards can be opened for any recruit by clicking on their underlined name.
 - Add recruits you wish to scout and build interest in to your watch and/or call lists by highlighting a recruit within a list and clicking on C to add him to your call list, W to add him to your watch list, or B to add him to both your call and watch list. You can also add an individual recruit to the Call or Watch list within his Recruit card.
 - Once you have finished creating your call and watch lists, you should then select the recruiting actions you want to take for specific recruits on your list(s). These actions are shown in the right hand section of the recruit screen when a recruit's name is highlighted from the list:
 - Details—provides basic information that you presently know about a recruit.
 - Phone—opens a phone call to the recruit where you can try to gain information about his interests and his parents.
 - Offer Scholarship— if you have available scholarships to offer you can click on this to offer a recruit a scholarship. Recruits typically begin accepting offers on Sept.11 but a few may accept scholarship offers a week or two earlier.
 - Watch Film—provides skill ratings for that recruit.
 - Scout Live—provides notes and information about the recruit based on a scouting trip by your coaching staff.
 - Host Recruit—a recruit will visit your campus and provides his feelings about your school based on that visit (these will be shown in a subsequent email).
 - Visit Recruit—head coach visits recruit's home and provides his feelings about your school and the visit (these will be shown in a subsequent email).
 - Once you have completed all the actions you want to do that week, click on Advance (in blue in the upper left of the screen) and those actions will be taken and you will proceed to the next week.

- **Scheduling:** Every September 18 the Athletic Director's proposed schedule will be displayed, but you can change any pre-conference game by selecting another available opponent and selecting to change that game. Once you have completed reviewing the schedule (and making changes, if desired), click "Advance" (but be sure you've already completed the Recruiting activities for that week first).
- **Practice Sessions:** Player issues may arise and be reported to you via emails for which you have to decide if actions need to be taken. These actions can be taken by contacting (phoning) the player and discussing his attitude. There will be feedback from the player and a possible relationship change.

Game Play:

- Between November 13 and the end of February, pre-conference and conference games will be played. Conference tournaments begin in March and 4 post-season tournaments begin are conducted from mid-March to early April.
- If you have placed a check mark for "Default to Simulating Human Games" within GAME OPTIONS, your team's games will be simmed. If not, you will play out your team's games, unless you uncheck the blue box to the left of your team's game in the Daily Schedule.
- To play or sim games, click on the **"Play/Sim button" (blue basketball icon)** at the top left of the page that appears from November 13 to the end of the post-season tournaments. The "Today's Games" screen will then open. For each day any games in the conference you have selected to keep track of will be shown on the Daily Schedule. Clicking on the "Game Preview" icon in the upper right corner for each scheduled game will display information on the players that are tops in scoring, assists, and rebounding for both teams plus injuries and team stats for both teams.
- If you are simming, you can sim individual days, a week of action, to a specific date, or to the conference tournaments, post-season, or entire season.
- If you are playing out your games, click on "Play/Sim Games" and games other than your team's game will be simmed.
- If your team has no game that day, the next day will open on the Today's Game screen and the results of previous day for games teams in your conference played will be shown in the lower left (if you have turned on "Show Prior Day Scores" on the Game Options screen). On the right side, league news will be shown for any team's in your conference that had games the prior day.
- But when your team has a game to be played on a given day, after other games on that day have been simmed, a screen will open showing the Visiting and Home teams. Click on the "2D Gameplay" button and the starting lineups for each team will then be displayed. Then clicking on the "Go to Tip-Off" button will take you court screen where the game can be played.
- If you wish to change your lineup, click on the "Subs/Coaching" button which takes you to the "Coaching Options" screen that lists your players with their ratings and game stats. It also has a visual display of your present players who will be on the court. To change players, highlight the player you want to enter the game from the player list and then click on the player on the visual display who you want replaced. (This screen also allow you to perform actions when a time out is called or there is a game stoppage during the game). To return to the court screen, click on Close.
- On the court/game screen, you can take actions related to Coaching Options, Offensive Options, Defensive Options, and Matchups/Double Teaming. You can also adjust the speed at which the game will play by using the Game Speed slider.

- To begin play, click on the advance arrow button (blue arrow below the middle of the court) or use the CTRL button on your keyboard. To pause action, click on the pause button (in blue immediately left of the advance action arrow) or use the BACKSPACE button on your keyboard. Play proceeds as a 2D visual display of action on the court along with a Play-by-Play log or Recent Plays showing below the court. The Game Score, Time Outs remaining, Team Foul information, Player and Team stats, and Player Energy bars (green turning to orange to yellow and to red as a player becomes more exhausted will be updated as play continues. Team stats are updated as the game proceeds.
- During Time Outs that you call, you will be able to call a play (if your team will be putting the ball in play after the time out). Also during time outs, you will be able to motivate the entire team or an individual player.
- At the end of the half, the box score for the first half can be reviewed and your lineup changed (if desired). At the end of the game, click on the advance blue arrow button to review end of game box score and view the Player of the Game.

Creating a Universe Mode Association:

- Universe Mode allows you to create an association where you can control more than one coach. The set up is similar to creating a Challenge Mode or Sandbox Mode association, except that after creating a coach and assigning him to a job, you are given the option to create a new coach and can do that as many times as you wish before Saving and Finishing League Creation.
- You then can perform actions for each coach you created as the season progresses within that coach's screens and Advance or Play/Sim Games within the Commissioner screen.

Loading a Saved Association:

- From the Main Menu select LOAD ASSOCIATION and then choose the .cbb file for an association you've already created that you want to use. If you want to load the association you most recently used and saved, you can click on CONTINUE ASSOCIATION rather than LOAD GAME.
- The association will load. Once it's loaded, click on "Log In" and your association will open to your team's Dashboard screen. You can then perform whatever actions you are able to do at that point in the season or review association, conference, team or player information.

Promotion/Relegation Mode:

- Teams are initially arranged in 22 conferences (Conf. A through Conf. V) of 16 teams each, according to their prestige rating. These teams play out a normal schedule of pre-conference and conference games with a conference tournament after conference play concludes. There then are the normal four post-season tournaments.
- The next season the 4 teams in each conference with the best conference record will be promoted to the next higher conference (if a team that wasn't in the top 4 in the conference wins the conference tournament, that team will be promoted in place of the 4th place team). The 4 teams in each conference with the worst conference record will be relegated to the next lower conference.

- Additionally, the 5 teams with the lowest prestige rating initially are listed as Independents (not a part of any conference). You can look at these 5 teams as Division II teams, playing as many games as possible (15 or 16 in Promo/Rel) against Division I opponents and trying to have a good enough record in those games to gain enough respectability to make it into Division I the next season. At the end of the pre-conference period, they will not play any other games in DDSCB21. But the best of these teams will be promoted to Conference V the next season (and the 4 lowest teams in Conference V will drop down to become Independents the next season).

Exhibition Games:

- From the Main Menu, select “Exhibition Game” to play individual exhibition games. You will select the .cbb file for the association you wish to use and click on “open”. A screen will appear that allows you to select the two teams you want to play each other.
- You can also change one or both teams to be under “user” (human) control if you wish by clicking on the button following “Select Control” for the team(s). If you want both teams to be controlled by the computer, leave the button to indicate “CPU” after “Select Control” for both teams.
- When you’re ready to play out the game, click on the “Begin Game” button and proceed with the game.
- [Note: Some players use exhibition games as a way of learning about their players and team before preconference games commence within their association.]

Tournament Maker:

- From the Main Menu, select “Tournament Maker” to set up and play out your own tournament.
- To create a tournament, click on **Create New Tournament** and enter a tournament name, select the number of teams you want in that tournament (64, 32 or 16), and click on the “Choose Save File” button and select the .cbb file for the association from which you want to select teams. Then click on the “Setup Brackets” button which will take you to the Tournament Setup screen:
- If you want the CPU to enter all the teams in the brackets, click on Auto-Fill Brackets. But if you want to fill the brackets yourself:
 - Select each team and choose the seed number you want for that team in the bracket and click on the “Set Seed” button. That team will then be entered into the bracket. Continue until all bracket spots are filled. Then click on the “Save Bracket” button and you will be taken to the screen where you can either sim games (by clicking on the “Simulate ___ vs ___” button) or play out games (by clicking on the “Play ___ vs ___” button). At any point you can also click on View Stats to view player stats for all teams (stats are sortable by column).
- If you want to quit before a tournament is completed, click on the “Exit” button and you will return to the Main Menu.
- When you complete the tournament, click on the “Exit” button which will take you back to the Main Menu.
- If you want to come back to the tournament you can do so by clicking on Tournament Maker within the Main Menu and then clicking on Load Previous Tournament and selecting the .cbb file for the tournament you wish to re-enter.

Import CB20 Association:

- When you choose this option, a screen will open with notes provided for importing a CB20 association. BE SURE TO READ THESE. Here's the basic steps to accomplish the import:
 - If you used the College Mod for your CB20 association, install College Mod Version 21.0.1 of the College Mod (released on 3/2/21) in DDSCB21 so that the graphics will be installed when you import.
 - Make sure the CB20 association you will be importing is at the May 1 (before Buying Reports) stage.
 - From the DDSCB20 Saves folder select the .cbb association file you want to import.
 - If you have used custom (modded) logos, graphics, and courts in your CB20 association, be sure to manually copy those to the appropriate folders in CB21.
 - After the import has loaded, SAVE the association in CB21 before proceeding or exiting the game.
 - Four additional teams are included in CB21 and those will have been added to you imported association as well as the resulting realignment of conferences.
 - If you used the College Mod in your CB20 association and installed Version 21.0.1 of the Mod, then to have the four new teams with real life names, nicknames, on court jerseys, and logos, you need to do the following:
 - Click on "SCHOOL INFO" (bottom left of screen).
 - Use the "Team Name" drop down menu on middle left of main screen and type a few letters of the below list. For example: type "SE" and then select "SE Louisville"

Search For	School Name	Nickname	Abbrev	City	State	Arena Name	Capacity
SE Louisiana	Bellarmine	Knights	BELL	Louisville	KY	Knights Hall	2196
Saint George	Dixie State	Trailblazers	DIXIE	St. George	UT	Burns Arena	4779
Stephenville	Tarleton State	Texans	TL.ST	Stephenville	TX	Wisdom Gym	3000
Cal-San Diego	UC San Diego	Tritons	CALSD	La Jolla	CA	RIMAC	5000

- Notice that the logo and on court jerseys are missing! The court should already be loaded. In the middle of the screen just above the court click "Edit Team Information" and enter the table below starting with school name, Mascot Name and so forth:

School Name	Logo	Home Jersey	Away Jersey	Alternate Jersey
Bellarmine	1CM_bellarmine	1CM_whi78	1CM_red36	1CM_blu77
Dixie State	1CM_dixiestate	1CM_whi77	1CM_red86	
Tarleton State	1CM_tarletonstate	1CM_whi64	1CM_pur85	
UC San Diego	1CM_ucsandiego	1CM_whi12	1CM_blu88	

- Then for Logos and on court jerseys load the below graphics by using the "Browse Button". The colors should be OK, but change if you wish.

- Be sure to SAVE your association once you have completed all these steps.

Update Multiplayer Association:

- Selecting this option will open a dialog box that you can select your multiplayer league similar to the function of loading a league above. The multiplayer file will be in the same xxxx.cbb format also as above. The difference here is that the program will use the FTP information that you set up in your multiplayer league, and start transferring files from your FTP site to your computer where the game is running. Once imported, the commissioner may then perform his duties and updates.

On-Line and Multiplayer Associations

Multiplayer Association Info

- The Commissioner's Screen is identical in Multiplayer mode as it is in Sandbox or Challenge Mode. Only the Multiplayer portions of the screen that apply will be discussed here.

Commissioner Password

- This is your password to login to the Commissioner's Office. A password for the Commissioner is required for Multiplayer associations.

Site File Transfer Protocol (FTP)

- Because each server is different you may need to do some trial and error to find the proper setup for your server. It is recommended you attempt to upload the files and find the right configuration before beginning any season tasks.
- Before using the FTP option, you **must** do the following first on your server:
 - Create a folder matching the final pathname you set below such as AssociationFiles.
 - Inside of that folder create a folder that matches what you use for your save game filename. If your save is called MNL.cbb then create a folder called MNL in the AssociationFiles folder.
 - Inside of that folder create a folder called Owner.
- ***Before uploading your association files, be sure to save your association first! Failure to save before uploading could cause the association files to not upload properly, cause inconsistencies in your MP files or cause an error where sim results could be lost.***
- **Site FTP Address**
 - Typically, this is something like **ftp.yoursite.com**.
- **FTP User Name**
 - Your username to login to your FTP site.
- **FTP Password**
 - The password to login to your FTP site.
- **File Pathname**
 - We recommend creating a folder on your site called **AssociationFiles**. Depending on your site this would be configured as **Yoursite.com/AssociationFiles** or just **AssociationFiles**.

Multiplayer Association – Human Owners

- **Add New Coach**

- This adds a new human player to the game. When you click on the Add New Coach button, a new dialog box appears to confirm that you want to add a new player. Just click the Create New Coach button below to add a new human player to your league. Once the new Coach is added, you may edit their information by using the **Edit/Add Coaches** button on the right side of the commissioner office page.
- **Select Coach**
 - Once you have added a new Coach, use the drop-down box to select the new player. At this point the new Coach will be generically named HUMAN PLAYER. This is just a placeholder until you edit them later. To set them up, choose HUMAN PLAYER from the drop down.
- **Coach Password**
 - Enter the password for the new Coach and click the button to save the password. Remember that the password is case sensitive. You must press the Update Password button to save a Coach's password, even if creating a new Coach.
- **Choose Team**
 - Select the team for the new Coach from the drop-down.
- **Update Password**
 - This will update a Coach's password.
- **Add to Team**
 - Pressing this button will add the new Coach to the team that was chosen from the drop-down above.
- **Remove from League**
 - If a Coach desires to retire from playing the game, you may delete them. Select their name from the drop down, then press the Remove from Association button. This will permanently remove that Coach. Remember, once a Coach is removed, they cannot be recovered.

Multiplayer Association Management

- For leagues using FTP protocols. Otherwise the Commissioner collects the team files via email or other means and places them in the \app\disk\Multiplayer\ [Association Name] folder.
- **Upload to / Download from Server**
 - This will transfer files to/from the server using the FTP protocol. You will upload files after completion of all the activities for the simulation period. This will allow other Coach to then download those files to find out the results of the sims. You will download files that other Coaches have posted before you run the sims to put into place any actions that the Coaches might have made for their teams.
- **Import Team Files**
 - If you are using the "Hot Seat" method of gameplay where there is only one computer and several Coaches, or if you are gathering the files by hand and placing them in the correct directory, you will still need to import the team files into the game. All the team files must be in the \app\disk\Multiplayer\ [Association Name] folder. If you download files from the server, they will be placed here automatically. Just press the Import Team Files button to import them into the game.
- **Box Score Options**
 - Again, because each server setup is different, you have several options for the generation of HTML box scores of games played. There are a significant number of files produced for all the box scores, so depending on your server, you may want to generate all, just human Coaches, or none at all.
- **Generate All Box Scores**

- This will generate all box score for all games.
- **Generate Human Team Box Scores Only**
 - This will generate HTML box scores for all the games played only with human Coaches.
- **Do Not Generate Box Scores**
 - This will not generate any box scores regardless of human or AI Coach.

HTML Page Options

- **Generate Individual Player Pages**
 - You can move the toggle switch to ON to generate individual player pages for viewing on the team website. Depending on the speed of your computer, this may take considerable time. It does provide a wealth in information about players on the web, so it is valuable.
- **Generate Human Team Pages Only**
 - If you would rather see just the human controlled team pages, then flip this toggle switch to on.
- **Generate HTML**
 - Pushing this button will generate files that you designated by toggles above, but also standings, players, individual team pages, recruits, and schedule.

Periodic Actions

- Prior to the Commissioner taking processing the Next Actions as the season progresses, the Coaches will communicate their actions (e.g., buying reports, camps to attend, contacts and offers for transfers, recruiting activities, depth chart changes, practice plans, strategy changes, negotiations or actions related to assistant coaches, etc.) via the “MP Export” button.
- Once these are received (using the “Import Team Files”), the Commissioner will process the pending Action.
- For Associations not using FTP, Coaches email their files and the Commissioner places them in the app/disk/Multiplayer/YourLeagueName folder and then processes the pending Action.

Exporting Rookies to Draft Day Sports: Pro Basketball

There are two different ways to do this:

- A. **Linked League**—*These steps must be followed precisely:*
 1. Create your DDSCB association. From the Game Options screen, turn on the linked league option, go back to the league and advance it past the Buy Reports stage, at least, and SAVE.
 2. Create the DDSPB league and link it to your DDSCB association during league creation.
 3. Play some of both DDSCB and DDSPB making sure to save DDSCB as you go because DDSPB will automatically pull in the updates on the players based on the saved game file.
 4. When the seasons are over, you must go past the “End Season” stage in your DDSCB association BEFORE you go to the “View Awards” in your DDSPB league because its at that point the final rookie class is set and brought into DDSPB. SAVE your DDSCB association after the “End Season” stage BEFORE you “View Awards” in your pro league. SAVE your pro league after the awards.
 5. Run the draft and offseason items in DDSPB up until you get to the rookie class creation stage.
 6. Make sure you have advanced and saved your DDSCB association past the Report Buying stage.

7. Once you are past the “Buy Reports” stage in DDSCB, then you can advance your league in DDSPB past the rookie class stage and go back to step 3.

Here’s the process for running the linked DDSCB and DDSCB games:

- When starting the leagues you should start them with the same year for the sake of bringing their college stats into the pro game. Here’s the timeline of how things setup.
- Lets say you use the default for both games which is 2020 as the season. College Basketball starts you in May while Pro Basketball starts you in October (assuming you choose the normal start option). College Basketball takes you through the summer recruiting etc into the season which ends up in April and “end season” at the end of April while Pro Basketball doesn’t “end season” until the middle of June. That is why the instructions tell you that you have to go past the “end season” stage in College Basketball before you go to the “view awards” stage in Pro Basketball because that way your college draft class has been finalized and the awards stage is where the final class is pulled in and a draft class is actually set in Pro Basketball.
- So ideally after the initial link when you are playing a season you do all the CB summer stuff to get to the season time and get caught up to PB’s date since PB starts in October. Then you play out the seasons together so that if you are in Nov 2020 in PB you are in Nov 2020 in CB and you keep that going until you hit the “end season” stage in CB which is at the end of April. Once you go past that you stop CB while you do all the offseason stuff in PB. Then when you get to the stage for the next draft class (Oct 2021) you start up CB again which is in May of 2021 at that point and you pause on PB while you get CB caught back up through the summer. From that point its rinse and repeat.
- As a reminder for anyone who is linking leagues if you go to the menu drop down in either game under HELP you will find the explicit step by step instructions on when to do each item in each game to make sure your process is correct.

B. Non-linked League

- In this scenario you really want to play out your season in DDSCB first advancing past the “End Season” stage there as that is when the PBDraft.rkf file will be generated.
- You need to copy this out of your DDSCB21/app/disk/saves/yourcollegeleaguename folder and place it in the DDSPB21/app/disk/saves/yourproleaguename folder.
- Then begin your offseason activities in DDSPB.
- After the D-League draft you will be given options to prepare the rookie class. Choose the File Import option and that will bring in your DDSCB draft class for the draft that will take place after your current pro season.
- After your draft is complete go back and play your next season in DDSCB and repeat the process.

Restore Backup:

- Should your association have a problem and you need to go back to the last successful save, select Restore Backup, select the association file you want, and the .cbb file for that association. Your association will then be restored.
- Frequent Saves are a good idea to avoid loss of activity you performed in the event of a glitch in the game program, your internet, or your computer.

- Another handy function of using Restore Backup is if you want to test certain recruiting or game play activities or depth chart setups. Save your game before trying your theory, then make your adjustments and play the game. If it didn't quite work out the way you wanted it, simply go back Restore Backup, and the game will recommence from the point of your last save.

License Key Management

- Allows you to activate or deactivate your game's license.

Database Editing

- Allows editing of default database for conference or teams.
